

## ATHLONE CASTLE VISITOR CENTRE

### **Audio Guides Sanitising Procedure**

Audio guides will be cleaned before and after each use. An intense procedure will be applied to sanitize them:

The surface of the device will be cleaned with single-use disinfectant wipes.

Instead of drying the device with a cloth, we will wait three minutes for the liquid to evaporate in order to extend its action time.

We will continue to monitor and update our Visitor Policy in line with best practices and advice from the government.
